

HOW IT WORKS

Meet the first auto belay with catch-and-hold technology!

TOUCH TO ACTIVATE

When the blue light starts flashing, catch-and-hold is ready to go.

START CLIMBING

Check your harness and make sure you're clipped in before beginning to climb.

IF YOU FALL

CATCH

If you fall, this auto belay will immediately catch you and allow you to try again.

HOLD

You can rest up to seconds. When the blue light flashes, your time is almost up.

CLIMB ON!

Resume climbing at any time. To come down, simply wait for the countdown to end.

If catch-and-hold is not activated, this device will operate exactly the same as a normal auto belay

WELCOME TO THE TOP!

PRESS TO LOWER

If you don't press the big blue button,
you will automatically lower when the
catch-and-hold timer runs out.
