

LIGHTSPEED

ZIP LINE TROLLEYS

Designed for Durability

The LightSpeed series of zip line trolleys are specifically designed for zip line use and are engineered to last longer. Our engineers looked at the most common issues that zip lines face and addressed each issue with the LightSpeed Trolleys. The series includes the Impact Trolley, EZ Clip Trolley, and Micro Trolley.

HIGH SPEED

Self-contained, high-quality bearings make these the fastest compact trolleys available. LightSpeed trolleys are rated for running speeds up to 75 mph (121 kph).

IMPACT BRAKING COMPATIBLE

All LightSpeed trolleys are designed for impact braking with a durable front impact surface. Our design creates a smooth rider experience while reducing wear on your equipment and line.

PREVENTS EXCESS WEAR

In most trolleys the forward momentum of the rider causes the front sheave to lift off the line and the back end to drag. Our design prevents this and helps your equipment last longer.

MADE TO LAST

The LightSpeed series are durable, lightweight trolleys that are made to last. They are rugged enough to withstand impact braking without unnecessary bulk.

TROLLEY SELECTION

MICRO

Dimensions: 4.8 in (123 mm)
Weight: 0.8 lbs (364 g)

EZ CLIP

Dimensions: 5.7 in (145 mm)
Weight: 1.1 lbs (507 g)

IMPACT

Dimensions: 7.1 in (180 mm)
Weight: 1.2 lbs (544 g)

FEATURES

	MICRO	EZ CLIP	IMPACT
Impact Braking Compatible	■	■	■
Dual Line Compatible	■	■	■
Rated to 75 mph	■	■	■
Rated to 330 lbs	■	■	■
Cable Diameter Up To: 3/8 in ≤ ∅ ≤ 1/2 in (9.5 mm ≤ ∅ ≤ 13 mm)	■	■	
Cable Diameter Up To: 3/8 in ≤ ∅ ≤ 3/4 in (9.5 mm ≤ ∅ ≤ 19 mm)			■

COMPATIBLE ACCESSORIES

Hook	■	■	■

ACCESSORIES

LANYARD

Zip line specific lanyard designed for ease and versatility in rider connection. Available in 4 lengths: 12 in (30.5 cm), 16 in (40.6 cm), 24 in (61 cm), and 36 in (91.4 cm)

COMPATIBLE WITH ALL TROLLEYS

HANDLEBARS

The handle keeps riders facing forward with their hands free from the impact area (essential with impact braking) and pivots to smoothen the impact, swinging with the rider as they decelerate.

EZ CLIP & IMPACT TROLLEY OPTIONS

HOOK

The hook interacts with a catch mechanism on the brake trolley to prevent riders from rolling away from the landing zone, allowing a guide to easily pull the rider to the platform.
